THE VOICE OF REAL ESTATE

THE NEW ADMINISTRATIVE CAPITAL

AN OVERVIEW OF THE CAPITAL TO BE

Egypt is to move its capital 45 kilometers east, away from the worn out infrastructure and the traffic gridlock, off to a new lavish city, dubbed as the New Administrative Capital, with green spaces said to be twice as big as New York's Central Park. With the first phase of construction officially launched in October 2017, Invest-Gate takes its readers on a tour of the new capital, reviewing the many completed and under-construction projects.

"We are going to use everything modern and state-of-the art in terms of planning, design, technology and IT."

Ahmed Zaki Abdeen
Chairperson of the Board
of Directors of the Administrative Capital Company

Egypt is ambitious to complete the development of the first phase within three to four years maximum, aiming to include a government district to house a new presidential palace, a parliament, 32 ministries as well as foreign embassies.

Construction of
