

An aerial photograph of a coastal scene. In the foreground, white-capped waves are breaking onto a sandy beach. A long wooden pier extends from the shore into the ocean, with several people visible walking along it. The water transitions from a light turquoise near the shore to a deeper blue further out. The sky is filled with soft, white clouds, and the sun is low on the horizon, creating a warm, golden glow across the entire scene.

Abstract

The North Coast Real Estate Report provides an in-depth comprehensive analysis of the North Coast area obtained through updated market data, including the current and upcoming projects along with their investment value.

The report will comment on the high potential of the North Coast investment market from New Al-Alamein to Marsa Matrouh Cities. The research is covering all aspects of the North Coast destination such as the infrastructure, private and public developments, and urban development. This report also includes a public survey, generating feedback from regular homebuyers.

The North Coast Real Estate Report showcases the area's actual investment value, being a top seasonal destination compared to other coastal destinations, where the demand still remains higher than the supply.

About North Coast

Egypt's northern coastline "North Coast" stretches from Al Dekheila to Marsa Matrouh for about 1,050 kilometers, deeming it one of the longest Mediterranean coastlines in North Africa; yet it remained abandoned, comprising a hotel or two up until the 1980s, when the Housing and Development Bank (HDB) in Egypt started funding residential compounds for second homebuyers. Then on, the private sector came along.

In the 1990s, the North Coast became among locals and Arabs one of the top summer destinations with HDB's Marina Al-Alamein resort compound. The Marina phenomenon was to become a fully-integrated city for permanent residence. It was supposed to have schools, university, and some mixed-use complexes. In the late 1990s, some developers from the private sector developed some hotels inside Marina Al-Alamein, like Amer Group's Porto Marina, to which the developer acquired land within the Marina premises and added his own residential units.

Given the Marina model, many developers jumped in the North Coast early 2000s to build on that and attempted to fix many errors in that model. Today, the development of the rest of the North Coast from Al-Alamein until Marsa Matrouh is progressing with the speed of light and all are racing to have their versions of integrated communities and maybe, collectively, they can make the North Coast an all-year-round destination and open to the rest of the world... "The Egyptian Riviera."

North Coast Developments

Note

Missing data, if applicable, was not mentioned based on the developers' request. All projects' data provided in this report has been approved by the developing companies. The collection, arrangement, analysis, and assembly of all content is our exclusive property.

North Coast SWOT Analysis

Strengths

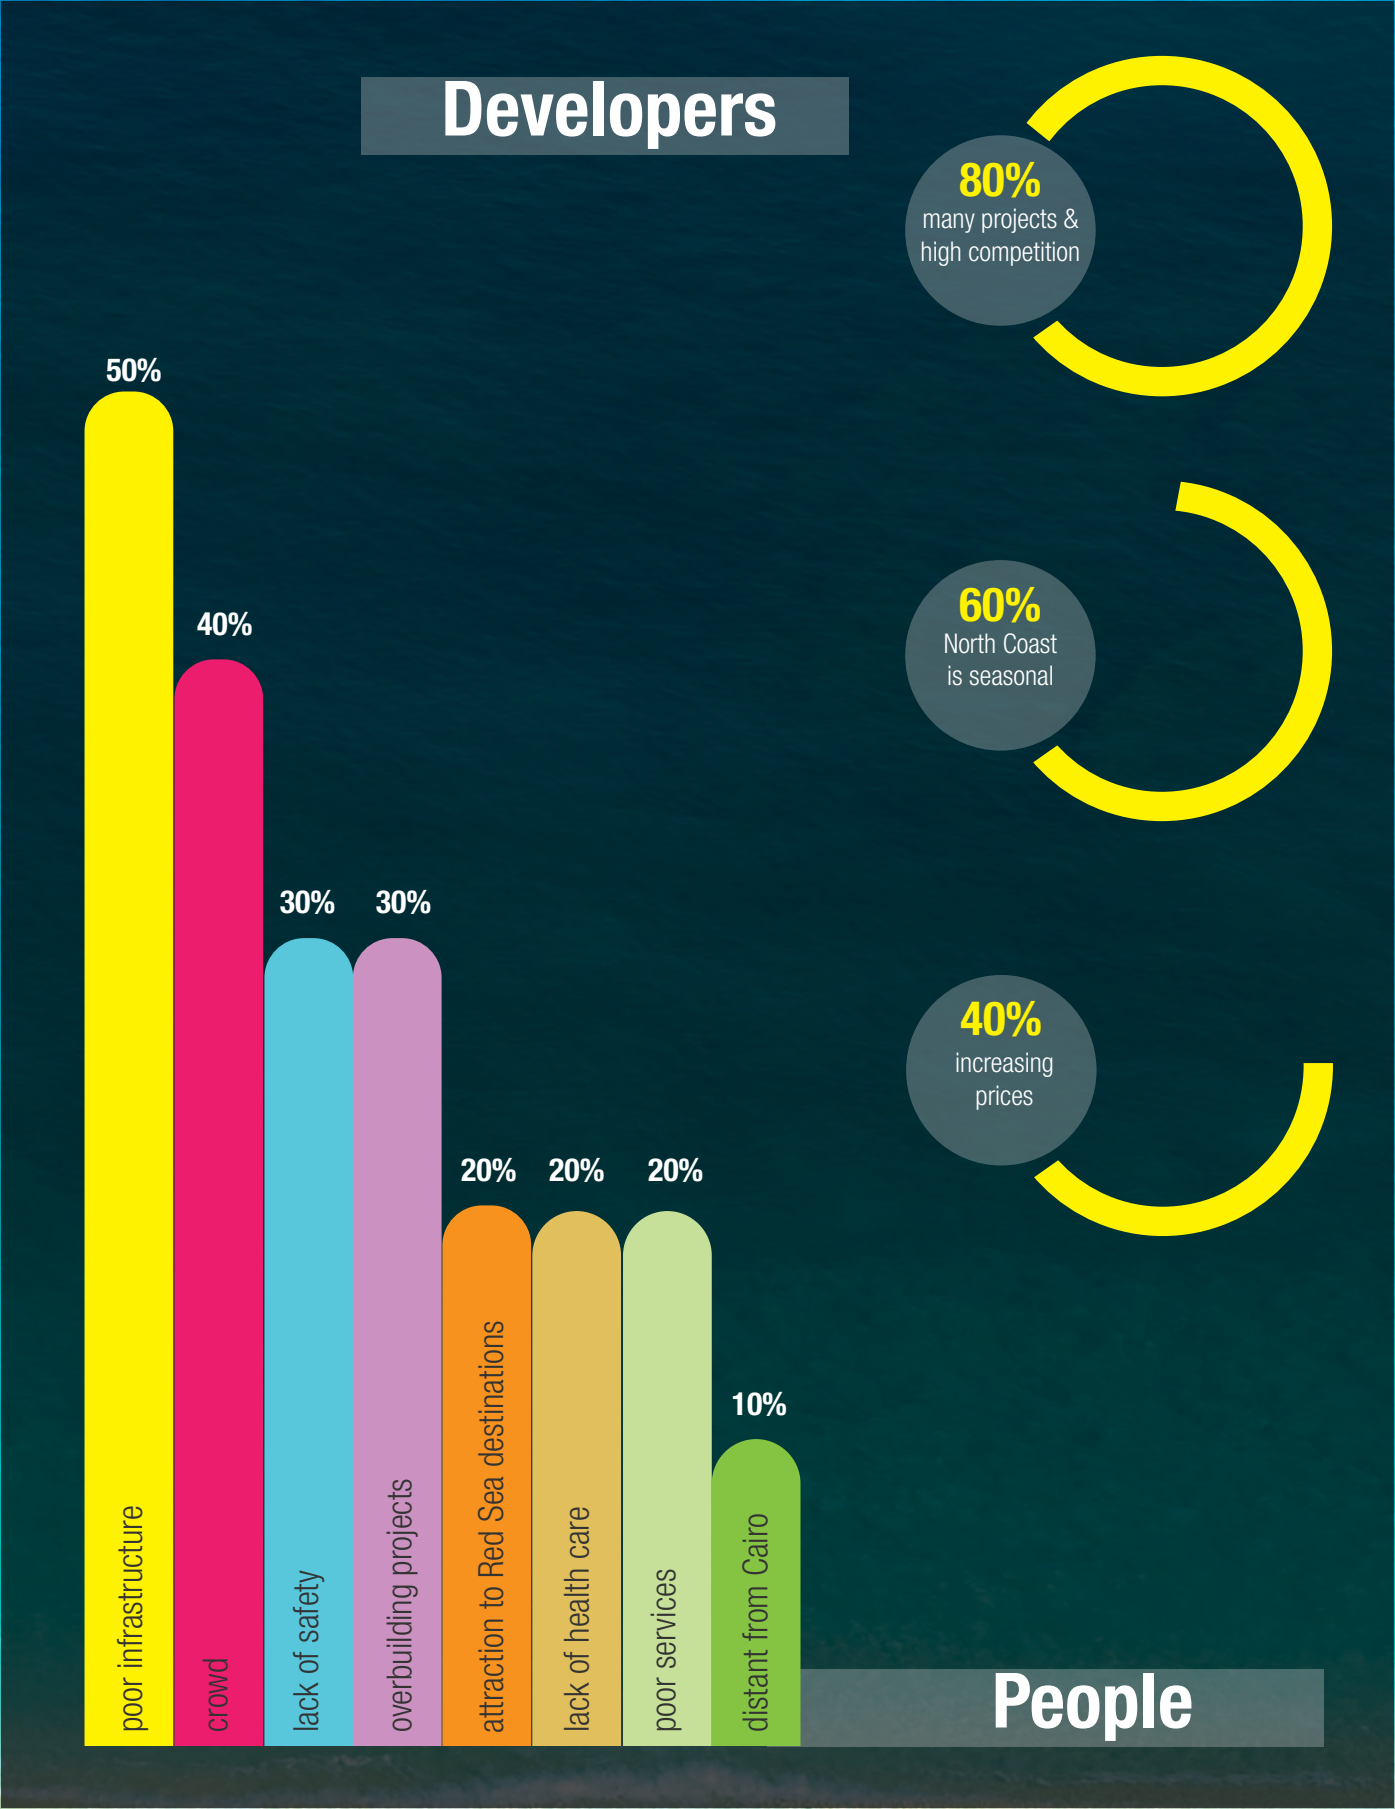

Weaknesses

Opportunities

Threats

Research Findings

- North Coast is the top coastal destination among Egyptians. Most of the people spend around two to four weeks annually.
- People of ages (25-40) stay the longest periods in the North Coast.
- Big developers in the market are investing in the North Coast with over 30 development projects in the area from New Al-Alamein to Marsa Matrouh.
- The majority of available projects are sold out rapidly.
- An estimated 79% of the current supply of units was sold out.
- Developers are offering a wide range of choices in the unit types, facilities, services in their compounds, which are meeting people's preferences.
- There is an increasing demand of 82% in smaller-sized- units (apartments-chalets)
- The supply of smaller-sized units reached 78%.
- The top three features at any new development project are: Club houses, swimming pools, and night clubs.
- The top activities preferred by the public are restaurants/cafes, water activities, and night life with 70% focus on restaurants/ cafes.
- People think that there are a lot of strengths and opportunities in the area like the location, weather, community, and beaches, among its proximity from main cities. On the other hand, crowd, overbuilding of compounds, and the lack of healthcare services remain a threat.
- Some developers believe that high competition and the difficulty of extracting building permits remain.
